HEALTHY CORAL REEF CARDS

Directions:
1) Make a color copy of the cards (50 Healthy Reef, 50 Unhealthy Reef). If possible, use two-sided color printing alternating between healthy and unhealthy cards.
2) If you are not able to use two-sided color printing, then you can glue one sheet of healthy reef cards to a sheet of unhealthy reef cards.
3) Cut out and laminate the cards.

Note: The healthy reef cards have an (H) in the bottom right-hand corner and the unhealthy reef have a (U).
